

INSULATED 'U' BOLTS

EzyStrut's heavy duty insulated 'U' bolt is supplied with a 10mm thick cork and neoprene base.

It is designed to provide support for large heavy weight pipes made out of stainless steel, duplex/super duplex or other materials.

Suitable for heavy industrial applications where pipes need to be insulated, EzyStrut offers very heavy duty clamps, saddles and 'U' bolts that feature a thick neoprene lining as well as some with a cork base.

These components are normally used in petrochemical facilities, as the neoprene creates a resistance to chemicals and other substances that could otherwise compromise the support. They are also suited to areas that are subject to chemical wash downs.

Technical Details

The insulation protects the clamps from substances and materials that could compromise them, and features self extinguishing fire retardants making them suitable for hydrocarbon installations such as oil and gas and similar environments.
