**Design, though often quite technical, is first and foremost about emotions: seeing, understanding, feeling and experiencing. That's why at Hager, our goal is above all to put a 'face' to our products: one of balance, serenity, elegance and refinement.**

**“We must create products that not only reflect that we care, but reflect our philosophy and brand identity”**

**Erwin van Handenhoven**

## finesse

Our architecturally inspired finesse range is sure to impress audiences with its minimalistic and precise design, and is considered to be ingeniously simplistic.

### finesse

# A quality finish right down to the wire

## Fingerprint resistant

For maximum lustre, our metal covers have a treated surface to reduce fingerprint marks.

## UV stabilised

Strong impact resistant polycarbonate material will not 'yellow' over time.

## Slim profile

With a thickness of only 4mm off the wall surface, silhouette and finesse has the lowest profile on the market.

## Standard 16AX mech

All of our standard mechanisms will handle a true 16AX fluorescent load.

Extensive research with architects, interior designers, electrical contractors and consumers have created a dynamic, fully featured range of switches and sockets - with an array of styles, colours and finishes to suit any space.

### Child safe shutters

A spring loaded shutter protects little fingers from live parts inside sockets.

### Roto-loc<sup>®</sup> mechanism

The patented Roto-loc system eliminates the possibility of the mechanism being pushed back into the wall cavity.

### IP2X compliance

Provided with either a retained hinged cap in allure or deep screw receptor with finesse or silhouette for faster installation.

### Added value

A full range of accessories and mechs including electronic push buttons and dimmers are also available.

### Description

Our range of Weatherproof Isolators are designed to be used in indoor or outdoor applications with IP66 degree of protection. They are switch disconnectors for 2, 3 and 4 pole supply, from 20A to 63A. Rated at AC-23A, they can also be used to isolate motor/compressor loads without derating. They provide ample wiring room and are easy to install with a 2 screw quick release top cover.

### Electrical Specification

- AS/NZS IEC 60947-3
- Rated voltage:  
250V AC 50/60Hz  
440V AC 50/60Hz
- Utilization category  
AC-21A, AC-22A, AC-23A for switching any type of load from resistive to highly inductive loads

### Mechanical Specification

- IP66
- External material is UV stabilised polycarbonate
- Ø25mm top and bottom cable entry hole caps
- Ø25mm and Ø20mm conduit entry knock-cuts
- Ø20mm mounting holes
- Handle provides Ø6mm shank padlocking facility (ON & OFF position)
