#### **Motion Sensor Instructions**

Definition of the ambient brightness; only when the ambient brightness is lower than the preset specific lux amount, the sensor will work; when it's preset as "Disable" the sensor works everytime it detects motion regardless of the ambient brightness.

The period of light keeping 100% brightness after moving objects leave the detection area.

In this area, movement will be detected and able to trigger the sensor. 100% detection area is also nown as the strong sensitivity.

#### **Detection Patterns**

The highest mounting height is 6m.

This figure indicates the maximum distance at the highest mounting height with 100% sensitivity.
