

Anti Vibration

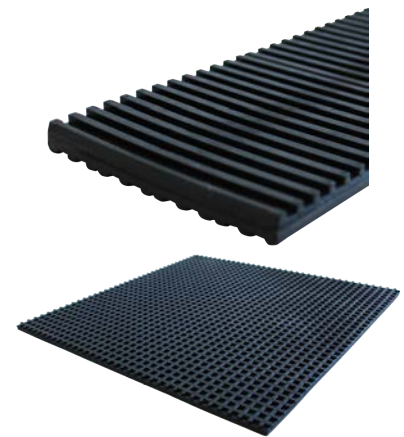

Our high quality range of anti vibration mounts are designed to reduce noise and vibration.

We have a large range to allow for various installations. Fixings come with a rust resistant coating.

Waffle Pad

The waffle pads have a grid pattern which make them virtually non-slip, they are also designed to minimize the transmission of shock, noise and vibration caused by machines including air conditioners.

Made from a neoprene/EPDM they are often used to compensate for unevenness between surfaces, whilst also providing a barrier to prevent the migration of moisture from the base to metallic machine parts.

PART NO.	DESCRIPTION
VWP4545	10mm Waffle Pad Square (450mm x 450mm)
VWP10010	10mm Waffle Pad Strip (1000mm x 100mm)

Ripper Waffle Pad

*18 pieces per sheet w/pre drilled hole. Easy to tear off rectangles.

PART NO.	DESCRIPTION
VWP3030R	10mm Rippable Waffle Pad Square (300mm x 300mm)
