## REDBACKLADDERS

Redback Ladders manufacture superior quality fibreglass ladders at a competitive price. We design and manufacture our entire range of ladders to Australian and New Zealand Standard AS/NZS1892.3:1996

Independent testing on each design is undertaken by a **NATA approved laboratory** to ensure you get **strength, durability** and **peace of mind** with your investment in our product.

Redback ladders are **built strong** to handle repetitive, everyday use making them the perfect choice for trade or commercial applications.

All Redback Ladders are manufactured with an industrial rating to **withstand loads of up to 150kg**, one of the highest load ratings available and comes with a standard **two year warranty**.

### Why choose a Redback Fibreglass Ladder?

Redback Fibreglass Ladders decrease the risk of electrocution by providing isolation between the user and earth and as such are highly recommended for use in an electrical environment. Fibreglass ladders are compulsory in most states when operating in an electrical environment.

### How do I select a Redback Ladder?

If selecting a **Redback Step Ladder**, it is recommended that you choose a ladder that is approximately 0.6 metres shorter than the height that you wish to reach.

If selecting a **Redback Extension Ladder**, it is recommended that you choose a ladder that is approximately 1.0 metre longer than the height that you wish to reach.

### Where do I purchase my Redback Ladder?

Redback Fibreglass Ladders are distributed by MMS Safety nationally throughout all states within Australia through electrical wholesalers. Please refer to the Redback Ladders website: [www.redbackladders.com.au](http://www.redbackladders.com.au) for specific locations, wholesale outlets and stockists.
